MEMORANDUM FOR THE RECORD

25X1A

SUBJECT: Discussion of [] Power Supply with

STATOTHR

25X1D

25X1A

STATOTHR

1. [] passed on the following information pertaining to the subject power supply this morning:

- a. The Shipping and Handling Manual will be available in approximately one week.
- b. It appears, at this time, that the supply will have to be packed in dry ice, or other suitable provisions made, if the ambient air temperature exceeds 70°.
- c. It is estimated that 50 lbs. of dry ice should provide adequate cooling for approximately 8 hours.

25X1A

- d. [] is planning for the supply to be picked up at the [] Company, Baltimore, and will probably request its return on 25 August at [].

2. [] pressed harder than ever for operational details of our work, and I again explained that our security is based on compartmentation, and that I invade [] area no farther than is absolutely necessary. With regard to the power supply, I told him that all we expected was the specified power at the specified terminals on the supply, and we would take care of the power supply in accordance with their instructions. I refused to comment

3. [Redacted] recommended that the power supply be left fueled when returned to [Redacted] in order to preclude more temperature cycles on the supply than necessary. If necessary, the supply can be defueled and packaged in about a day. I told [Redacted] we would give him as much warning notice as possible.
